

## LOW-VOLTAGE HIGH-SPEED QUADRUPLE DIFFERENTIAL LINE DRIVER WITH $\pm 15$ -kV IEC ESD PROTECTION

### FEATURES

- Meets or Exceeds Standards TIA/EIA-422-B and ITU Recommendation V.11
- Operates From a Single 3.3-V Power Supply
- ESD Protection for RS422 Bus Pins
  - $\pm 15$ -kV Human-Body Model (HBM)
  - $\pm 8$ -kV IEC61000-4-2, Contact Discharge
  - $\pm 15$ -kV IEC61000-4-2, Air-Gap Discharge
- Switching Rates up to 32 MHz
- Propagation Delay Time . . . 8 ns Typ
- Pulse Skew Time . . . 500 ps Typ
- High Output-Drive Current . . .  $\pm 30$  mA
- Controlled Rise and Fall Times . . . 5 ns Typ
- Differential Output Voltage With 100- $\Omega$  Load . . . 2.6 V Typ
- Accepts 5-V Logic Inputs With 3.3-V Supply
- $I_{off}$  Supports Partial-Power-Down Mode Operation
- Driver Output Short-Protection Circuit
- Glitch-Free Power-Up/Power-Down Protection

### SUPPORTS DEFENSE, AEROSPACE, AND MEDICAL APPLICATIONS

- Controlled Baseline
- One Assembly/Test Site
- One Fabrication Site
- Available in Extended ( $-55^{\circ}\text{C}/105^{\circ}\text{C}$ ) Temperature Range<sup>(1)</sup>
- Extended Product Life Cycle
- Extended Product-Change Notification
- Product Traceability

(1) Additional temperature ranges are available – contact factory

### DESCRIPTION/ORDERING INFORMATION

The AM26LV31E is a quadruple differential line driver with 3-state outputs. This driver has  $\pm 15$ -kV ESD (HBM and IEC61000-4-2, Air-Gap Discharge) and  $\pm 8$ -kV ESD (IEC61000-4-2, Contact Discharge) protection. This device is designed to meet TIA/EIA-422-B and ITU Recommendation V.11 drivers with reduced supply voltage.

The device is optimized for balanced-bus transmission at switching rates up to 32 MHz. The outputs have high current capability for driving balanced lines, such as twisted-pair transmission lines, and provide a high impedance in the power-off condition.

The AM26LV31ES is characterized for operation from  $-55^{\circ}\text{C}$  to  $105^{\circ}\text{C}$ .

### ORDERING INFORMATION

$T_A$	PACKAGE <sup>(1)(2)</sup>		ORDERABLE PART NUMBER	TOP-SIDE MARKING
$-55^{\circ}\text{C}$ to $105^{\circ}\text{C}$	SOIC – D	Tape and reel	AM26LV31ESDREP	A26LV31ESP

(1) Package drawings, thermal data, and symbolization are available at [www.ti.com/packaging](http://www.ti.com/packaging).

(2) For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI website at [www.ti.com](http://www.ti.com).

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

FUNCTION TABLE<sup>(1)</sup>

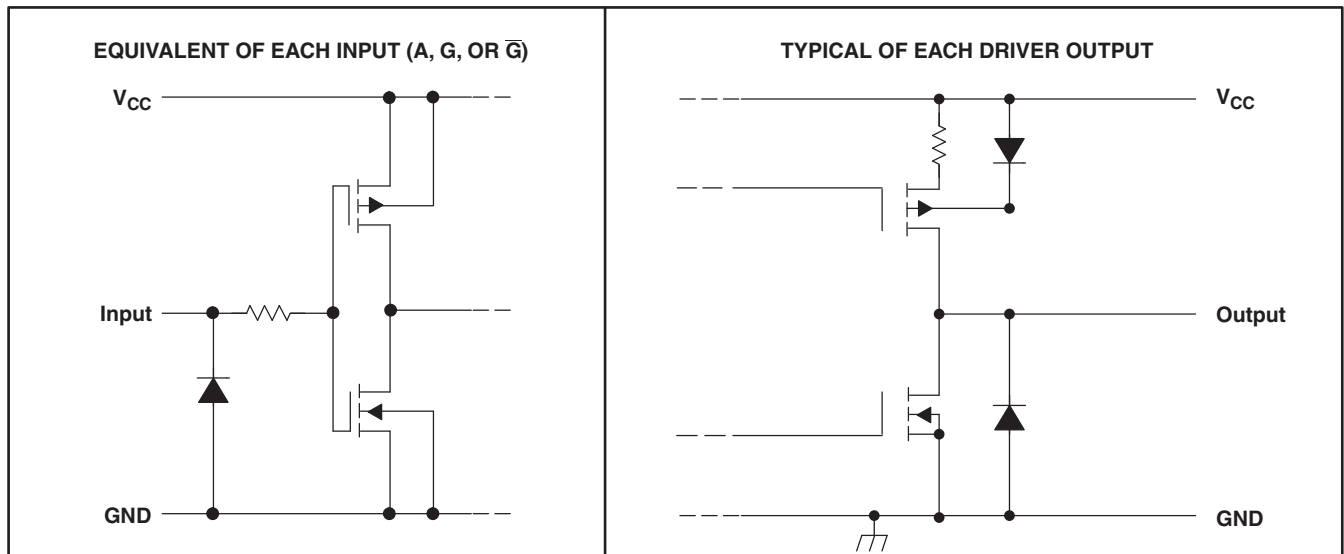

INPUT A	ENABLES		OUTPUTS	
	G	$\bar{G}$	Y	Z
H	H	X	H	L
L	H	X	L	H
H	X	L	H	L
L	X	L	L	H
X	L	H	Z	Z

(1) H = high level, L = low level, X = irrelevant, Z = high impedance (off)

LOGIC DIAGRAM

SCHEMATIC

**ABSOLUTE MAXIMUM RATINGS<sup>(1)</sup>**

over operating free-air temperature range (unless otherwise noted)

		<b>MIN</b>	<b>MAX</b>	<b>UNIT</b>
$V_{CC}$	Supply voltage range <sup>(2)</sup>	-0.5	6	V
$V_I$	Input voltage range	-0.5	6	V
$V_O$	Output voltage range	-0.5	6	V
$I_{IK}$	Input clamp current	$V_I < 0$		mA
$I_{OK}$	Output clamp current	$V_O < 0$		mA
$I_O$	Continuous output current		±150	mA
	Continuous current through $V_{CC}$ or GND		±200	mA
$T_J$	Operating virtual junction temperature		150	°C
$\theta_{JA}$	Package thermal impedance <sup>(3)(4)</sup>		73	°C/W
$T_A$	Operating free-air temperature range	-55	105	°C
$T_{stg}$	Storage temperature range	-65	150	°C

- (1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.
- (2) All voltage values except differential input voltage are with respect to the network GND.
- (3) Maximum power dissipation is a function of  $T_{J(max)}$ ,  $\theta_{JA}$ , and  $T_A$ . The maximum allowable power dissipation at any allowable ambient temperature is  $P_D = (T_{J(max)} - T_A)/\theta_{JA}$ . Selecting the maximum of 150°C can affect reliability.
- (4) The package thermal impedance is calculated in accordance with JESD 51-7.

## RECOMMENDED OPERATING CONDITIONS

		MIN	NOM	MAX	UNIT
$V_{CC}$	Supply voltage	3	3.3	3.6	V
$V_I$	Input voltage	0		5.5	V
$V_{IH}$	High-level input voltage	2			V
$V_{IL}$	Low-level input voltage			0.8	V
$I_{OH}$	High-level output current			-30	mA
$I_{OL}$	Low-level output current			30	mA
$T_A$	Operating free-air temperature	-55		105	°C

## ELECTRICAL CHARACTERISTICS

over recommended ranges of supply voltage and operating free-air temperature (unless otherwise noted)

PARAMETER	TEST CONDITIONS	MIN	TYP <sup>(1)</sup>	MAX	UNIT
$V_{OH}$	High-level output voltage	$V_{IH} = 2\text{ V}, V_{IL} = 0.8\text{ V}, I_{OH} = -20\text{ mA}$			V
$V_{OL}$	Low-level output voltage	$V_{IH} = 2\text{ V}, V_{IL} = 0.8\text{ V}, I_{OL} = 20\text{ mA}$			V
$ V_{OD1} $	Differential output voltage	$I_O = 0\text{ mA}$			V
$ V_{OD2} $	Differential output voltage	$R_L = 100\ \Omega$ (see Figure 1) <sup>(2)</sup>			V
$\Delta V_{OD} $	Change in magnitude of differential output voltage	$R_L = 100\ \Omega$ (see Figure 1) <sup>(2)</sup>			V
$V_{OC}$	Common-mode output voltage	$R_L = 100\ \Omega$ (see Figure 1) <sup>(2)</sup>			V
$\Delta V_{OC} $	Change in magnitude of common-mode output voltage	$R_L = 100\ \Omega$ (see Figure 1) <sup>(2)</sup>			V
$I_{O(OFF)}$	Output current with power off	$V_{CC} = 0, V_O = -0.25\text{ V or } 5.5\text{ V}$			$\mu\text{A}$
$I_{OZ}$	High-impedance state output current	$V_O = -0.25\text{ V or } 5.5\text{ V}, G = 0.8\text{ V or } \overline{G} = 2\text{ V}$			$\mu\text{A}$
$I_I$	Input current	$V_{CC} = 0\text{ or } 3.6\text{ V}, V_I = 0\text{ or } 5.5\text{ V}$			$\mu\text{A}$
$I_{OS}$	Short-circuit output current	$V_O = V_{CC}\text{ or GND}^{(3)}$			mA
$I_{CC}$	Supply current (total package)	$V_I = V_{CC}\text{ or GND}, \text{ No load, enable}$			$\mu\text{A}$
$C_{pd}$	Power dissipation capacitance	No load <sup>(4)</sup>			pF

(1) All typical values are at  $V_{CC} = 3.3\text{ V}, T_A = 25^\circ\text{C}$ .

(2) Refer to TIA-EIA-422-B for exact conditions.

(3) Not more than one output should be shorted at a time, and the duration of the short circuit should not exceed one second.

(4)  $C_{pd}$  determines the no-load dynamic current consumption:  $I_S = C_{pd} \times V_{CC} \times f + I_{CC}$

## SWITCHING CHARACTERISTICS

over recommended ranges of supply voltage and operating free-air temperature (unless otherwise noted)

PARAMETER		TEST CONDITIONS	MIN	TYP <sup>(1)</sup>	MAX	UNIT
$t_{PHL}$	Propagation delay time, high- to low-level output	See <a href="#">Figure 2</a>	4	8	12	ns
$t_{PLH}$	Propagation delay time, low- to high-level output		3.5	8	12	ns
$t_t$	Transition time ( $t_r$ or $t_f$ )	See <a href="#">Figure 2</a>		5	10	ns
$t_{PZH}$	Output-enable time to high level	See <a href="#">Figure 3</a>		10	20	ns
$t_{PZL}$	Output-enable time to low level	See <a href="#">Figure 4</a>		10	20	ns
$t_{PHZ}$	Output-disable time from high level	See <a href="#">Figure 3</a>		10	20	ns
$t_{PLZ}$	Output-disable time from low level	See <a href="#">Figure 4</a>		10	20	ns
$t_{sk(p)}$	Pulse skew	See <a href="#">Figure 2</a> <sup>(2)(3)</sup>		0.5	3	ns
$t_{sk(o)}$	Skew limit (pin to pin)				1.5	ns
$t_{sk(lim)}$	Skew limit (device to device)				3	ns
$f_{(max)}$	Maximum operating frequency	See <a href="#">Figure 2</a>		32		MHz

(1) All typical values are at  $V_{CC} = 3.3\text{ V}$ ,  $T_A = 25^\circ\text{C}$ .

(2) Pulse skew is defined as the  $|t_{PLH} - t_{PHL}|$  of each channel of the same device.

(3) Skew limit (device to device) is the maximum difference in propagation delay times between any two channels of any two devices.

## ESD PROTECTION

PARAMETER	TEST CONDITIONS	TYP	UNIT
Driver output	HBM	±15	kV
	IEC61000-4-2, Air-Gap Discharge	±15	
	IEC61000-4-2, Contact Discharge	±8

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

**TBD:** The Pb-Free/Green conversion plan has not been defined.

**Pb-Free (RoHS):** TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

**Pb-Free (RoHS Exempt):** This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

**Green (RoHS & no Sb/Br):** TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) Multiple Top-Side Markings will be inside parentheses. Only one Top-Side Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Top-Side Marking for that device.

**Important Information and Disclaimer:** The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

PLASTIC SMALL OUTLINE

- NOTES:
- A. All linear dimensions are in inches (millimeters).
  - B. This drawing is subject to change without notice.
  - C. Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0.006 (0,15) each side.
  - D. Body width does not include interlead flash. Interlead flash shall not exceed 0.017 (0,43) each side.
  - E. Reference JEDEC MS-012 variation AC.

## IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
