

Clock and Timing Solutions

Comprehensive, flexible and easy-to-use clock ICs

Accelerate Time-to-Market with Easy-to-Use Clocking Solutions

Texas Instruments is the world's #1 supplier of analog semiconductor ICs, and offers a complete clock and timing IC portfolio – from oscillators to clock buffers and generators to jitter attenuators and RF PLLs/synthesizers – targeting a broad spectrum of end-equipment. These easy-to-use, high performance clocking products are supported by a number of innovative, robust online tools that ease design and reduce time-to-market.

Clocking solutions from TI offer:

- Flexible frequency planning
- Universal input and output formats
- Best-in-class jitter and phase noise performance
- Low power consumption
- In-system programming
- Sophisticated clock design tools that automate selection, configuration and simulation of TI clocking devices

Addressing broad applications:

- Wireless communications
 - Base stations
 - Repeaters
 - Satellite communications
- Wired communications
 - Enterprise switches and routers
 - Optical transport networks
 - Servers and storage
- Industrial
 - Industrial automation
 - Test and measurement
 - Medical
 - Video surveillance
 - Energy monitoring
- Automotive
- Consumer
- Reference designs for industry-leading SoC processors and FPGAs

Clock Oscillators

Improve system BER, timing margin, SNR with high performance oscillators from Texas Instruments. TI's high performance differential oscillators offer industry's lowest jitter of 90fs (12 kHz-20 MHz). Offered in the industry standard 7 mm x 5 mm and 5 mm x 3.2 mm package, the LMK6xxx family of oscillators enable high performance and flexible design for the most demanding reference clock requirements.

Portfolio key features

- Typical jitter: 90 fs RMS (12 kHz-20 MHz)
- Total stability: ± 25 ppm and ± 50 ppm
- LVPECL/LVDS/HCSL formats
- Fmax of 1 GHz
- 3 flavors: fully programmable with EEPROM, pin selectable and fixed frequency versions
- 7 mm x 5 mm and 5 mm x 3.2 mm
- 3.3 V
- PSRR: -70 dBc, robust supply noise immunity
- Best-in-class resistance to vibrations

Fixed Freq
LMK61xx-FFMFF
LMK62xx-FFMFF
LMK60xx-FFMFF

Pin mode
LMK61PDxxx

Programmable XO
LMK61Ex

Clock Generators

Reduce the clutter of crystals and oscillators, simplify your design and reduce your bill-of-materials (BOM) with clock generators from Texas Instruments. TI's clock generator portfolio, ranging from low power to ultra-low jitter (as low as 150 fs RMS), can consolidate multiple crystals in consumer and industrial applications as well as telecom/datacom applications.

Portfolio key features

- Integrated PLL and VCO for smaller BOM
- Integrated LDOs for supply noise rejection
- Multiple clock outputs at very low jitter
- Fractional dividers for ultimate flexibility
- Integrated clock distribution with programmable dividers
- Programmable output formats (CMOS and diff.)
- Spread spectrum clocking to reduce EMI

CDCM6208V1EVM:

Evaluation module for 8-output clock generator

Featured Clock Generators

Device	Description	Input:Output	Output Type	Jitter	Programmability	End-equipment				
						Wireless	Wired/Networking	Industrial	Automotive	Consumer
LMK03328	Ultra low jitter, 8 output clock generator with Integrated EEPROM	2:8	CML, LVPECL, LVDS, HCSSL, LVCMOS	0.1ps RMS	I ² C, EEPROM, pin	✓	✓	✓		
CDCM6208	Any frequency, 2 input, 8 output with integer and fractional dividers	2:8	CML, LVPECL, LVDS, HCSSL, LVCMOS	0.265 ps RMS**	SPI, I ² C, pin	✓	✓	✓		
LMK03806	1 input, 14 outputs, ultra-low jitter with integer dividers	1:14	LVDS, LVPECL, LVCMOS	0.15 ps RMS**	μWire (SPI)	✓	✓	✓		
CDCE62005	3 input, 5 output with integrated dual VCOs	3:5	LVPECL, LVDS, LVCMOS	0.35 ps RMS**	SPI, EEPROM	✓	✓	✓		
CDCM6100x	1 input, 1-4 output, crystal oscillator replacement	1:1 (CDCM61001) 1:2 (CDCM61002) 1:4 (CDCM61004)	LVPECL, LVDS, LVCMOS	0.5 ps RMS**	Pin	✓	✓	✓		
CDCM9102	Low jitter, 2 channel, 100 MHz PCIe Gen-3, Gen-2, Gen-1	1:2	LVPECL, LVDS, LVCMOS	0.5 ps RMS**	Pin		✓	✓		✓
CDCE(L)913	1 PLL, integrated VCXO, spread spectrum clocking, 1.8 V/2.5 V/3.3 V outputs	1:3*	LVCMOS	60 ps peak-to-peak period	I ² C, EEPROM, pin	✓	✓	✓		✓
CDCE(L)949	4 PLL, integrated VCXO, spread spectrum clocking, 1.8 V/2.5 V/3.3 V outputs	1:9*	LVCMOS	60 ps peak-to-peak period	I ² C, EEPROM, pin	✓	✓	✓	✓	✓
CDCE706	3 PLL, spread spectrum clocking, ultra flexible output switching matrix	1:6	LVCMOS	65 ps cycle-to-cycle	SMBus, EEPROM	✓	✓	✓		✓
CDCS501/2/3	Spread spectrum clock generator	1:1	LVCMOS	110 ps cycle-to-cycle	Pin				✓***	✓
CDCE6214	Low power, high performance, easy to use general purpose clock generator with EEPROM	2:4	LVDS, LVPECL, HCSSL, LVCMOS	0.7ps RMS	I ² C, Pin, EEPROM	✓	✓	✓	✓	✓

* 2 PLL/5 outputs and 3 PLL/7 outputs also available

** as measured from 12 kHz to 20 MHz

*** Available for CDCS503-Q1

Products listed in teal are available 3Q 2017.

Clock Distribution/Fanout Buffers

Simplify your clock tree designs with pin-programmable universal clock buffers that support any input and any output format. TI's unique family of clock buffers and distributors offers maximum design flexibility with no compromise on performance and includes advanced features such as dividers and delays, addressing a broad range of communications, industrial and consumer applications.

Portfolio key features

- Lowest additive jitter to maintain performance in clock tree
- GHz range input and output clock frequency
- Integrated LDOs for improved supply noise rejection
- Multiple output banks that can be configured independently
- Programmable divider and output formats for higher flexibility
- Adjustable analog delay to accommodate board traces

Clock Distribution/ Fan-out Buffers/ Zero Delay Buffer

Device	Description	Input:Output	Input Type	Output Type	Max Frequency (MHz)	End-Equipment					
						Wireless	Wired/Networking	Industrial	Automotive	Consumer	Computing
LMK0030x	Ultra-low jitter configurable differential buffer/level translator, crystal oscillator	3:4 (LMK00304) 3:6 (LMK00306) 3:8 (LMK00308) 3:10 (LMK00301)	Differential, single ended, crystal	LVPECL, LVDS, HCSL + 1 LVCMOS	3100	✓	✓	✓

Evaluation module for 5-output fanout buffer/level translator

Clock Jitter Cleaners

Get the most out of your system with the industry's cleanest clocks. TI's clock jitter cleaners deliver the lowest phase noise and a wide range of output frequencies.

Portfolio key features

- Industry's best phase noise performance
- Single or dual loop PLL to reduce BOM
- Frequency hold-over and redundancy
- Programmable divider and output formats for higher flexibility

Featured Clock Jitter Cleaners

Device	Description	Jitter (fs)*	Max Output Frequency (MHz)	Number of Outputs	End-equipment				
					Wireless	Wired/Networking	Industrial	Automotive	Consumer
LMK04610	Dual PLL, ultra-low phase noise and ultra-low power, JESD204B compliant, integrated loop filters and LDOs, 2 selectable inputs, 10 outputs, frequency holdover mode, programmable delay	65	2000	10	✓	✓	✓		
LMK04616	Dual PLL, ultra-low phase noise and ultra-low power, JESD204B compliant, integrated loop filters and LDOs, 4 selectable inputs, 16 outputs, frequency holdover mode, programmable delay	65	2000	16	✓		✓		
CDCM7005	Low phase noise with frequency holdover, available in BGA package	230	2200	5	✓				
LMK0480x	Dual PLL, ultra-low phase noise, 2 selectable inputs, 14 outputs, frequency holdover mode, programmable delay	100	3072	14	✓		✓		
LMK0482x	Dual PLL, lowest phase noise, JESD204B compliant, frequency holdover mode, programmable delay	88	3100	15	✓		✓		
LMK04832**	3.2 GHz max. output frequency, Dual PLL, lowest phase noise and noise floor, JESD204B compliant, frequency holdover mode, programmable delay	80	3200	15	✓		✓		
LMK04906	Dual PLL, ultra-low phase noise, 3 selectable inputs, 7 outputs, frequency holdover mode, programmable delay	100	2600	7		✓	✓		
LMK04816	Dual PLL, ultra-low phase noise, 3 selectable inputs, 13 outputs, frequency holdover mode, programmable delay	100	2600	13	✓	✓	✓		

* As measured between 12 kHz to 20 MHz

** Sample available in March 2017

Industry's best performance

- Ultra low jitter: 65 fs typ 12 K-10 M
- Ultra low inband phase noise through leading BiCMOS technology

JESD204B made easy

- Industry's first and most popular JESD204B jitter cleaner family LMK0482x
- Supports JESD204B and non-JESD204B applications with a single device
- Full SYSREF support reduces SoC complexity and cost

PLLATINUM™ dual loop PLL

- PLLATINUM dual phase locked loop (PLL) concept reduces cost and improves performance
- Generates frequencies up to 3 GHz with an integrated high performance VCO

LMX25xx RF Synthesizer Family

The LMX25xx family of RF synthesizers integrates low noise VCOs along with low noise PLLs. The low power LMX2531 and LMX2571 enables energy efficient and mobile solutions, while still having best-in-class performance to meet industry standards. The high performance LMX2541, LMX2581, LMX2582, and LMX2592 covers up to 9.8GHz at the best noise figures in the industry to enable high performance solutions.

Portfolio key features

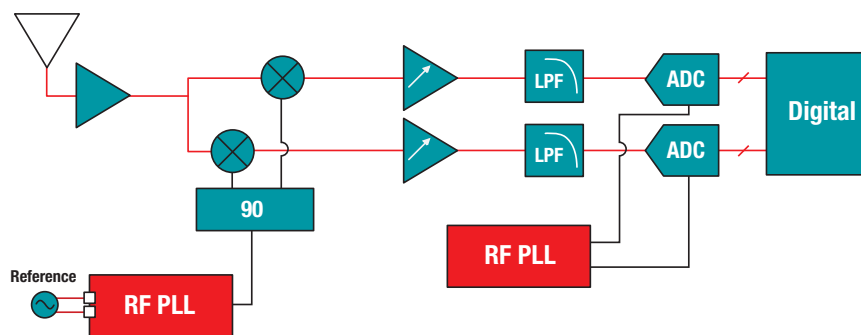

- Industry's highest performance, MC-GSM, compliant, integrated VCOs
- Industry's best PLL figure of merit for noise
- Integrated jitter <60 fsec for clocking high performance data converters

High performance synthesizer family with integrated VCO

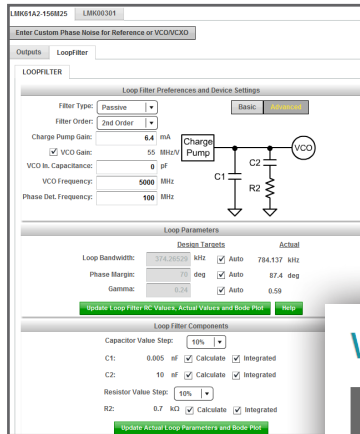

Device	Output Frequency(Min) (MHz)	Output Frequency(Max) (MHz)	VCO Phase Noise Normalized to 1 GHz at 100 kHz Offset (dBc/Hz)	Normalized PLL Phase Noise (dBc/Hz)	1/f Noise (10 kHz offset at 1 GHz carrier) (dBc/Hz)	Current Consumption (mA)	PFD frequency (MHz)
LMX2592	20	9800	-129	-231	-126	250	200
LMX2582	20	5500	-129	-231	-126	250	200

IMPORTANT NOTICE FOR TI DESIGN INFORMATION AND RESOURCES

Texas Instruments Incorporated ("TI") technical, application or other design advice, services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "TI Resources") are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using any particular TI Resource in any way, you (individually or, if you are acting on behalf of a company, your company) agree to use it solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources.

You understand and agree that you remain responsible for using your independent analysis, evaluation and judgment in designing your applications and that you have full and exclusive responsibility to assure the safety of your applications and compliance of your applications (and of all TI products used in or for your applications) with all applicable regulations, laws and other applicable requirements. You represent that, with respect to your applications, you have all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. You agree that prior to using or distributing any applications that include TI products, you will thoroughly test such applications and the functionality of such TI products as used in such applications. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

You are authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING TI RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS.

TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY YOU AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

You agree to fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of your non-compliance with the terms and provisions of this Notice.

This Notice applies to TI Resources. Additional terms apply to the use and purchase of certain types of materials, TI products and services. These include; without limitation, TI's standard terms for semiconductor products (<http://www.ti.com/sc/docs/stdterms.htm>), [evaluation modules](#), and [samples](http://www.ti.com/sc/docs/sampterm.htm) (<http://www.ti.com/sc/docs/sampterm.htm>).
